

INTRODUCTION

Ford Dealership Special Tools and Equipment

Typical Special Tools found at Ford Dealerships

As an experienced automotive technician, you undoubtedly have a substantial amount invested into your toolbox. Why?

- Because you know that without the right tool, even the simplest repair procedure can become an exercise in frustration.
- You also know that to do a job right, you need the right tool.

Ford uses the same philosophy when equipping its Dealerships. The tools found in the typical Ford Dealership incorporate the latest technology to meet the challenges of servicing the high-tech vehicles of today. You can see this commitment every day in your workplace, for example:

- Ford has provided each of its dealerships with a Pro-Cut on-vehicle brake lathe to ensure you have the best equipment to turn rotors.
- Ford also equips your dealership with special service tools specifically designed for brake repairs on Ford and Lincoln-Mercury Vehicles.
