Mr. J. M. Faichney,
District Inspector of Mines,
Mines Dept.,
PERTH, W.A.

11th February, 1958.

Dear Sir,

In answer to your letter dated the 23rd December, 1957,
which was forwarded by surface mail, please find below the information
requested.

ORIGINAL SECTION:

1. No change was made to the major airflows.

2.

Intake.

No. 1 Adit	5,000 c.f.m.
No. 1 Level	17,000 c.f.m.
No. 2 Level	15,000 c.f.m.
No. 3 Level	20,000 c.f.m.
TOTAL	67,000 c.f.m.

Exhaust.

Main Fan 70,000 c.f.m.

The development changes which directly affected the ventilation:-

- (a) No. 3 Drive broke through to Cliff Face
- (b) 9020 West Slope Drive connected to 1320 Chute and Mammy Rise giving a through ventilation to No. 4 Level.

4. Secondary Ventilation Appliances.

2D Fans	...	13 in use and 3 spare
2½SD Fan	...	1 in use
3SD Fan	...	1 in use
3½SD Fan	...	1 in use
4SD Fan	...	1 spare
Venturi Blower	...	1 spare

5. (a) The dust board at the discharge of the Ore Conveyor was eliminated by boxing around the discharge pulley and installing an exhaust fan discharging to atmosphere.
