Reference

Subject SPECIFICATIONS - VINYL CHLORIDE MONOMER

We have received notice from one of our two major customers requesting a reduction in our phenol inhibitor specification to 40-100 ppm.

Will you, therefore, please call a meeting of the specification committee to discuss this proposed change in our present inhibitor limits of 200-500 ppm.

W. E. Wiese
Technical Sales

WEW/rd

Sppfd 40 - 100 ppm now 200 - 500 ann 25%
Same mon. Less frock problem.
Remarks - 0 ppm on steel tank no polymerization.
