March 24, 1970

Dr. Otis E. Fancher, Ph.D.
Industrial Bio-Test Laboratories, Inc.
1810 Frontage Road
Northbrook, Illinois 60062

Dear Otis:

When I visited you on March 10, Kep gave me a handwritten statement of our Aroclor account (see copy attached). This indicates that as of January 1, 1970 we had a credit of $79,860 which had not been applied to the various projects underway in 1969.

If it is agreeable to you, I suggest application of this balance to the various projects as shown in the attached.

We would appreciate it further if you would arrange to bill us quarterly during 1970 in the amount of $22,500 and apply this again to the projects still underway as indicated.

I suggest that any additional cost for the fish study and for repeating (possibly) the leghorn study with 1242 be billed separately.

Now that you are all back from Atlanta I hope you will send me the estimated cost for chick edema studies and for Skydrol thermal decomposition studies.

For convenience I have also attached a copy of my letter of April 15, 1969 and June 12, 1969 which the attached schedule of payments supersedes.

I mentioned when I was with you that three of us were going to Europe on April 9. The trip now has been postponed to April 30 or May 7.

Best personal regards.

Sincerely,

Elmer P. Wheeler
Manager, Environmental Health

P. S. to JCC: The postponement of the European trip changes our itinerary to a degree not yet determined. I expect we will possibly spend the week of May 4 in Great Britain and the first part of the week of the 11th in Sweden and Holland. We do have a definite date for a meeting in Brussels on May 14.
