A What was the name of the bottom of that page?

Q I am sorry, I will be happy to show it to you.

This is Plaintiff's Exhibit Ford Number 78 dated August of 1973.

Do you recognize that document?

A Yes.

Q And am I correct that it says overexposure to asbestos fiber in the air can occur during inspection and repair operations on brakes, brake drums, clutches and associated components of these units when compressed air is used to blow out asbestos-laden dust?

A Yes.

Q Now, I think you mentioned a few moments ago it was roughly at this time that Ford started to develop the HEPA vacuum system?

A The Rotunda.

Q Rotunda, right.

A We happened to use the HEPA vacuum.
