AIR CONDITIONING REGISTERS AND GRILLES

No. 311-A—ADJUSTABLE DIRECTED AIR FLOW

With Horizontal Grille Bars

No. 311-A—Air Flow Downward Adjustable from straight to 45 deg.

With "INDEPENDENT" Adjustable Directed Air Flow Registers and Grilles the Engineer is in complete control of the direction of air flow.

The directional adjustment can be made at the time of installation—or after the system is operating, to meet unforeseen or changed conditions.

Patented

The method of adjustment is simple as shown, and many directions and combinations can be developed to suit the need.

No. 321-A—ADJUSTABLE DIRECTED AIR FLOW

With Vertical Grille Bars

Patented

Standard registers are furnished with single valves—they are also made with "Multiple Valves" operating in unison—also with rear "Deflecting Vanes" which can be adjusted individually—with which the Engineer is given a dual control of the air flow—being able to secure right and left together with up and down deflection at the same time.

No. 321-A—Showing a combination of Adjustments

Grille Bars set for straight, right and left deflection. The grille bars are set in a firm tension, yet easily adjusted, with the tool sent with each order.

Ceiling Outlet No. 1360-R

Ceiling Outlets offer one of the most flexible units for ventilation and distribution of cooled or heated air. The ceiling outlet grilles are of perforated metal.

Ceiling Outlets are furnished in several sizes—both Round and Square styles.

No. 311-A—Knob Control

The Nos. 311-A or 321-A Registers can be furnished with either Lever, Knob, Key, Chain or Pull Rod Control.

You should have the Independent Register Catalogues—Yours for the Asking.

Air Conditioning Registers, Vents and Grilles

Style 145

Style 145—U. S. Adjustable Bar Air Conditioning Registers specially designed for Summer Cooling and Cold-weather Warming. Bars adjust from 60 deg Up-Flow to 60 deg Down-Flow by a lever operating Pin that is removable after Adjustment. Does not MAR or INJURE Register finish.

Can be furnished with Box Band Frames or Studding Frames, and INSET PANELS.

Also furnished in Vertical Adjustable Bar Styles for Right or Left Adjusted Setting of Diffusers.

Style 153

Style 153—New "Louvre-Type" Style of Air Conditioning Register with Narrow Bar Spacing conducive to non-vision through Grille. Bars are 1/4 in. deep. Can be furnished in any Directional Flow, Horizontal or Vertical Styles. For complete Reference Refer to 1939 Edition General Catalog No. 27.

Also furnished with all styles of setting frames, and with INSET PANELS.

Style 177 V. V. I. or 145 V. V. I.

Letters V. V. L. used as suffix to an Air Conditioning Register Style Number means that this Register is equipped with Vertical Group Operated Valves that swing to complete Closing Position and to any desired practical angle of Deflection.

Can be furnished with Knob-Operators, Chain-Operators with Pulley, also Pole Operating.

The Style Number indicates the Style of Register Face and the suffixing Letters, for Example, V. V. L. means vertical Lever Operated Valves.

Letters H. V. L. means Horizontal Valves.

Further Data may be had in Latest General Catalog.

Letters V. V. I. used as suffix to an Air Conditioning Vent or Grille Style Number means this Grille is equipped with Vertical Deflector Back Blades that can be set individually in any desired Angle and Locked in that fixed position with Set Screw at end of each Blade.

This setting may be changed by adjusting Deflector Back Blades after Grille is installed.

Horizontal Back Blades are designated by Letters H. V. I.
