Aroclors FF

PCB Environmental Pollution Abatement Plan..

I Introduction

A "Ad Hoc" Committee
B Definition PCB, Tie in with Aroclor, nature of product.
C Relationship to other product Areas
D Investigation, problems as found

II Problem:
Simple statement

III Extensiveness
A USA, Canada & Europe
B Tie in with DDT.
C Evidence of Contamination in Remote parts of the world

IV Nature of the Problem.
Research & Medical input

V Effect on Monsanto
A Business potential
B Legal liability
C Public Image

DSW 373119

STLCOPCB4098933

I Effect on Customers

A Fire Resistance

B Electrical

C Food

D Die Cast

E Plastic & Adh.

F Paints & Coatings

G Carbonless & Paper

VII Involvement with other producers

A Foreign competitors

B Associated U.S. Industry

VIII Sources of Contamination

A Open pollution

1 Mainly Fluids

DSW 373120

B Indirect Pollution:

IX Recent technical changes which have bearing on the Contamination.

A Fluids - Phased away from higher chlorinated until waste recovery program.

X Courses of Action

A Do nothing

B Discontinue Mfg of Chlorinated biphenyls

C Respond responsibly, admitting that there is growing evidence of environmental contamination by the higher chlorinated biphenyls and take action as mandated is generated to correct the problem.

Recommended Course of Action

VII Implementation of the Recommended Course of Action

A. Immediate Action within 9 to 12 months -

1 Research - Medical

2 Marketing

3 Production

4 Legal

5 Public Relations

6 Liaison with other Mfgs

B. Long Range

1 Research Medical

2 Mfg. 6 Envr. Cont.

3 Engr. 7 Legal

4 Market. 8 Public Relations

5 Patent 9 Other
