DECON SHOWER

PLAINTIFF'S EXHIBIT

CHV-771

Heavy duty grating over pool

- Decontaminate equipment and personnel.
- High capacity - 8' long, 3' wide, 7½' high.
- Grating covered pool keeps asbestos fibers from recontaminating.
- Pool holds up to 50 gallons before draining.
- Assembles in minutes - collapses flat onto base/pool section.
- Base/pool frame unit and ramps available in aluminum or fiberglass laminated wood.
- NOTE: Drawings and instructions available for onsite fabrication by customer of base/pool frame and ramps.
- All fittings, hardware, drain and vent ports grating, and filters included.
- Replacement pool liners and shower tents available.

The manufacturer, Personnel Protection Inc., its agents and assigns, sell the Decon Shower without any implied warranty that it will prevent or cure any injury or health damage to the user due to asbestos contamination or any like substance.

Find the Need and Fill It — All of us in the business world can appreciate this important recipe for success.

Since the mid '70s we have grown by filling the critical environment protection needs of the nuclear industry*.

Our approach has always been to provide the customer a quality product — at a good price — when he needs it.

As the leading source of nuclear protective products*, our customers have depended upon us for the engineering and supply of asbestos removal protective/control products. We were manufacturing ventilation/HEPA filtration units, glove bags, supplied-air respirators, and total protection disposable coveralls before most people were aware of asbestos removal efforts. Many U.S. Navy yards specify that our products be used for the removal of shipboard asbestos pipe lagging.

FROM PERSONNEL PROTECTION, INC.

Garments of Tyvek®, Safeguard®, Sontara® and other materials available from stock. (See Product Bulletin No. PCP-D101 for selection information.)

Conventional types and sizes or custom fabricated to your specific needs. (See Product Bulletin No. PCP-C300 for selection information.)

Containment structures of all types. Prefabricated/portable contamination control structures, showers, etc. (See Product Bulletin No. PCP-C303 for descriptive information.)

Ventilation/HEPA filtration units. Portable units from 500 to 2000 CFM. These "certified" units feature extended filter life, fail-safe and simple controls, and exceptional portability and versatility. (See Product Bulletin No. PCP-E101 for specifications and user information.)

Our product and our manufacturing operation is approved by NIOSH. (See Product Bulletin No. PCP-SAR1 for complete information.)

(See Product Bulletin No. PCP-T100 for selection information.)

Bags, sheeting, and reinforced/laminated covering materials. (See Product Bulletin No. PCP-M101 for selection information.)

We print our own signs, bags, and labels. (See Product Bulletin No. PCP-T100 for selection information.)

(See Product Bulletin No. PCP-G102 for selection information.)

Our 300 people that make our products, our engineering and customer service staff — all of us look forward to the opportunity to serve you.

- * Nuclear Power Outfitters (NPO) is a division of Personnel Protection, Inc. All products sold by NPO have their origin with Personnel Protection's manufacturing operations. Virtually every nuclear facility in the U.S. and many around the world, along with every major nuclear maintenance project, have confidently utilized NPO/Personnel Protection products. Three Mile Island contracted with NPO to engineer and provide the systems that reduced the contamination/radiation to safe levels for entry and core removal work in the damaged reactor.

Members: National Asbestos Council (NAC)
Health Physics Society
Nuclear Suppliers Association
NIOSH (Approved Supplier)

Tyvek® and Sontara® are DuPont's registered trademarks
Safeguard® is a registered trademark of Kimberly-Clark
