MAIN OFFICE AND REFINERY

BRADFORD, PA.

June 7, 1940

Dr. Robert M. Kehoe
College of Medicine
University of Cincinnati
Cincinnati, Ohio

Dear Sir:

Undoubtedly you will recall receiving a copy of the Referee's report Pennsylvania Workmen's Compensation Board on the case of [REDACTED] who had made claim under the Occupational Disease clause of the Compensation Act for compensation as a result of illness claimed to be due to exposure to leaded gasoline vapors.

This report by the Referee held that there was no evidence to sustain the claim of illness due to lead poison.

The matter was later reviewed by the Compensation Appeal Board and we know that you will be interested in learning that this Board sustained the Referee's decision so that the case may now be considered as definitely closed.

Yours very truly

KENDALL REFINING COMPANY
