SUBJECT

Safety and Housekeeping
Advisory Committee

REFERENCE

TO

P. E. Brubaker

SAC has the following recommendations for the initial assignments for SHAC the Safety and Housekeeping Advisory Committee:

1. Handle the annual Safety and Housekeeping Inspection.
2. Resolve last year's annual safety recommendations.
3. Review and resolve any Hourly Safety Committee suggestions.
4. Initiate a visible safety program starting with bulletin board notices, hourly unit safety representative elections, complete the installation of the new logo sign, alter the existing safety sign at the Main Gate to include a stop light arrangement and a serious injury status board.
5. Develop a means to measure safety potential, that is a program that places emphasis on potential accidents, not on accidents that have already happened.
