80 Park Place
Newark, New Jersey 07101

Attention: Mr. R. M. Eckert

Gentlemen:

STEAM GENERATOR FOR
HUDSON GENERATING STATION-UNIT #2
FWC CONTRACT 2-79-2015

During the past year, a total of \$1,409,659.48 has been expended in placing this unit in service. Of this amount Foster Wheeler Corporation feels that we are responsible for \$924,863.22 for items as outlined in Table II and described in further detail in Appendix I - Pages 1 through 6. The remainder of \$484,796.26 involves cost of work as outlined in Table I which we consider to be reimbursable.

The item of Penthouse Pressurization is broken down as follows:

Field labor cost.....	\$107,215.73
Premium Time.....	6,878.00
Field installation of insulation for Penthouse Pressurization - Keasbey.....	28,899.62
Field work by Hemminger in connection with lagging changes for Penthouse Pressurization.....	13,000.00
Labor to close 81 penthouse penetrations for pressurization.....	2,905.79
Premium Time.....	988.00
TOTAL.....	\$159,887.14

As you know, it was agreed in one of our meetings that in spite of all our efforts and expense to furnish a pressure-tight enclosure in the penthouse, it was agreed that we would absorb the cost of all materials for this pressurization if you would pay for the field labor for installation.
