SUBJECT : "INCIDENTAL GENERATION" & OTHER NEW REGULATION POSITION PAPER

REFERENCE :

cc: L. J. O'Neill - F3EE
W. B. Papageorge - G4NH

TO : M. C. Throdahl - D1D

Attached is a draft of about a 15 to 20 minute presentation putting PCBs - health effects, incidental generation and other new regulations - into perspective.

This material could be used in a meeting such as you suggested with Sheldon Samuels.

The basis for this draft is a condensation of some material Larry O'Neill and I put together several months ago. While this condensation just hits the "high spots," it opens the door for more detailed questions and their discussion as they arise.

I'd appreciate your comments.

J. H. Craddock
