SPRINGFIELD, VIRGINIA 22151

September 16, 1975

Mr. D. B. Hosmer
Utility and Environmental Protection Director
Monsanto Industrial Chemical Co.
St. Louis Mall, Missouri 68166

Dear Mr. Hosmer:

This is to confirm our phone conversation of September 15 regarding Versar's current contract with EPA (No. 68-01-3259) "Microeconomic Analysis of Polychlorinated Biphenyls (PCBs)". As mentioned, we have been assigned a new task under this contract to assess the wastewater management and treatment technology for the PCB manufacturing/using operations and to develop associated costs. In view of Monsanto's position as the sole domestic producer of PCBs, it is apparent that we must base the first phase of our study on the input provided by Monsanto. We would appreciate, therefore, meeting with your technical people and visiting your plant.

As you know, the draft interim report on your operation is due on October 1. Therefore, we would like to visit your plant during the week of September 22, if it could be arranged.

I am enclosing a copy each of the following items:

- A copy of the contract for Task II.
- The Statement of Work for Task II. (The Statement of Work for Task I was forwarded to you on July 31.)
- A Plant Waste Analysis form

DSW 330376

Mr. D. B. Hosmer
September 16, 1975

The list of questions covered in the plant waste analysis form is intended to indicate to you the kind of information we desire. Please regard this list as a guide for discussions rather than a formal questionnaire. We anticipated asking questions beyond this list especially for generating information on the treatment technology.

Your cooperation is gratefully acknowledged.

Very truly yours,

Gayaneh Contos

(Mrs.) Gayaneh Contos
Chemical Engineer
