JAP-A-LAC Transparent Colored Varnishes

Wear Like Iron

JAP-A-LAC TRANSPARENT COLORED VARNISHES, as shown on the opposite page, should be used on all surfaces where a varnish and stain combined is required. These colors being transparent do not hide the grain of the wood, but instead, accentuate the natural beauty and grain of the wood on which they are applied. They rejuvenate old surfaces. *"Newness follows the brush."*

USES

FLOORS. JAP-A-LAC is the best and most durable finish ever discovered for finishing both soft and hard wood floors. It dries with a beautiful, hard surface that does not mar or scratch white and can be washed with hot or cold water. It dries in fifteen to twenty-four hours, according to conditions.

WOODWORK. Old front doors, stairways, base boards and all woodwork, no matter how badly marred or worn, can be beautifully refinished with JAP-A-LAC. It is the Dreadnought of wood finishes.

FURNITURE. JAP-A-LAC is a wonderful reviver of marred and worn furniture of all kinds. Tables, chairs, book-cases, beds, bureaus, refrigerators, etc. look like new after a coat of JAP-A-LAC.

JAP-A-LAC Floor and Interior Varnish (Natural)

This is a colorless, pale varnish and is used for the general refinishing of all kinds of woodwork, furniture, and floors where it is not necessary to change the color, and where a brilliant, varnished surface is desired. It is also excellent for finishing new interior woodwork and floors, and if you are building a new house, insist that it be finished throughout with JAP-A-LAC Floor and Interior Varnish (Natural). It produces a beautiful, lasting finish with depth and brilliancy. Does not mar white and is impervious to moisture. Can be rubbed and polished if desired.

JAP-A-LAC Model Floor Process

This process consists in applying two coats of JAP-A-LAC Ground Color and one coat of JAP-A-LAC Graining Color (which is grained with the JAP-A-LAC Graining Tool), and then two coats of JAP-A-LAC Floor and Interior Varnish (Natural). This produces an excellent imitation of an oak floor. For complete directions see our pamphlet "JAP-A-LAC Makes Old Floors New."

JAP-A-LAC Floor and Interior Varnish (Natural)

Jap-a-lac Model Floor Process

Ground Color Graining Color Finished Surface

NOTE: A few brushfuls of Jap-a-lac Floor and Interior Varnish (Natural) applied occasionally on your floor, in front of doorways and in other places subject to hard wear, will prevent the finish from wearing through to the wood and disfiguring the floor.
