THIS is no time to neglect thrift. It is no time to waste money. You do neither when you heat water by means of an Automatic Gas Water Heater. After all, it is just plain arithmetic, being proved daily in thousands of California homes, that you spend to save when you have an Automatic installed in your home.

Consider this: If you are using a water heater that has to be lighted with a match, and you also frequently resort to tea kettle hot water, every gallon of water so heated costs twice as much as it would

if hot insulated. You are getting in a big advantage. Prices are now low. See your dealer today. This is a thrift.
