Re: Meeetote MK-IV

Dear Tom,

The New York State area and the New England area are almost entirely changed over from MK-III to MK-IV.

We should move ahead on changing the Woodport and Easthampton plants from MK-III to MK-IV production; otherwise, these facilities will be idle if we cannot produce MK-IV. The market has definitely switched to a non-asbestos product in the Northeast.

Would appreciate anything you can do to expedite this change.

Best regards,

Jim Cintani
