

1 in 1946?

2 A Yes.

3 Q Now, based upon your review of the medical
4 literature, in the 1940s up to the 1950s, did you see
5 any published literature that criticized that
6 finding?

7 A No.

8 Q How about in the 1950s, did you see anything
9 in the '50s that said that conclusion that they drew,
10 or draw or whatever was wrong?

11 A No.

12 Q Did you see anything in the early '60s that
13 said that was wrong?

14 A No. No, not until the mid '60s did people
15 look back and realize that the problem with the study
16 was that most of the workers had only been employed
17 for a short period of time.

18 Obviously they didn't start building ships
19 for World War II until about 1939, 1940, and if you
20 did a study in '45, most of the people are going to
21 have five years of exposure.
