Bruce,

I did not locate any post 1945 brochures that show their block products. The brochures on the exhibit list did not have dates. I found the same brochures in the company files. I also checked the rogs for attachments and did not find any brochures with a date.

FYI - There was a memo dated March 5, 1986 from Sharan Sheppard re: Eagle-Picher Sales Brochures. In the memo, she states that the attached brochures were provided to her by a Pensacola client. She says, he received the brochures in 1957 directly from the "Eagle-Picher man." This includes the same brochure that I am faxing to you.

I will fax the one brochure that you are interested in.

I would like the brochure. Do we have any E-P brochures post 1945 that show their block products? I'd like to see if they still made it after 1955 so I know if it was non-asbestos or asbestos containing.
