McQUAY HI-F COILS

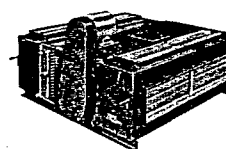

The famous McQuay Hi-F Ripple Fin coils are made in three tube diameters: 3/8 in., 1/2 in., and 3/4 in., in a wide variety of styles and sizes for steam, hot water, cold water and direct expansion and refrigerant condensing. Highest quality guarantees best performance and longest life from any Hi-F coil you choose from the most complete line of heating and cooling coils in the industry—from McQuay, of course. Unmatched rippled fin and staggered tube construction of Hi-F coils means maximum heat transfer, greater strength and highest efficiency.

REMOTE TYPE AIR COOLING CONDENSERS

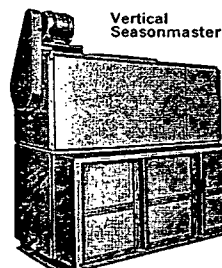

Type "AB" propeller fan type available in vertical or horizontal air flow. Nominal capacities of 7½ to 100 tons in 19 sizes. Type "AL" centrifugal fan type available for use with or without ductwork. Nominal capacity of 10 to 50 tons in seven sizes.
