Dr. L. E. Edelman,
Director of Research,
The Lake Erie Chemical Company,
2200 Scranton Road,
Cleveland, Ohio.

Dear Dr. Edelman:

I am reporting to you herewith the results of the most recent analyses which indicate that the situation so far as the lead and arsenic exposure of you and your associates, is satisfactory.

I shall have to be out of the Laboratory for a period of some weeks and will not be able to follow the details of these observations. However, we shall wish to carry on the analyses, and one of my associates will look after the results to see how they are going. Sample containers will be forwarded to you routinely, and I suggest that you continue collecting these at about ten-day intervals, as I indicated in a previous letter.

Cordially yours,

Robert A. Kehoe, M. D.
