Scott, Micah and Dean:

In reaching out to the new administration, Craig and I would like to introduce our organization:

Business for Water Stewardship is a network of over 1,200 companies from the Fortune 500 to main street retailers working on sustainable water policies and practices, and river flows in the American Southwest.

**Please see the attached letter in strong support of funding for the WaterSMART program** as a core driver of water infrastructure modernization and efficiencies.

Thank you for your attention to and consideration of the WaterSMART program.

All the best,

Molly D. Mugglestone
