Dr. Schafer,
Frigidaire Plant, No. 1,
Dayton, Ohio

My dear Dr. Schafer:

I am enclosing the record of my examination of
Mr. [REDACTED] with opinion of his condition.

There was no evidence that sulphur dioxide played
any role in causing his illness but it would seem advisable,
in the event that there is any claim filed, to obtain x-ray
pictures of the affected joints. An examination of the
larynx would also be helpful.

I hope that this record may be of assistance
to you.

Very truly yours,

Willard F. Machle, M.D.
