Industrial Hygiene Training

RECEIVED

FEB 3 1975

MEDICAL DIV.

In answer to your request to Oren Staffey and his communication to me, industrial hygiene training is an important and necessary function at the Aberdeen plant. I concur that such training would be valuable for the safety staff.

TRAINING COURSES

Mr. Frank Willson, Director of Safety, Aberdeen Chemical Plant, has solicited our recommendation for introductory industrial hygiene training for Mr. Owen Tubbs of the Aberdeen Safety.

While we feel such training would be very valuable to Mr. Tubbs and we can recommend institutions that offer such training, we feel the final decision as to whether or not he receive such training be made by you.

We wish to aid the efforts of the Safety Division in any way we can.

TRAINING COURSES

We have enclosed a brochure of Announced Courses of Training offered by the National Institute for Occupational Safety and Health. Our recommendations for an introductory industrial hygiene course would be No. 550.

If we can be of further help regarding this subject, please call our office.
