

March 23, 1966

Mrs. Toni Medlin
Administrative Assistant
to the Director
The Pennsylvania State University
301 Engineering Unit "C"
University Park, Pennsylvania 16802

Dear Mrs. Medlin:

I shall be pleased to have the work on air pollution, which is being carried out in the Kettering Laboratory under my direction, listed in your Index to Air Pollution. Since you may not have the full information, however, I am taking the trouble to provide you with it. Incidentally, I have retired as the Director of Kettering Laboratory, and of the Department of the College of Medicine of the University of Cincinnati of which the Kettering Laboratory is a part - this is now the Department of Environmental Health, of which Edward P. Radford, Jr., M.D. is now the Director. However, I am continuing, for a time, to handle the investigative work on lead.

The work is supported jointly now by Ethyl Corporation; E.I. du Pont de Nemours; The U.S. Public Health Service, through its Division of Air Pollution; Lead Industries Association; and American Petroleum Institute. (The organizations are listed in the order in which they entered into the sponsorship of the work, which was initiated in 1939, in relation to "The Metabolism of Ingested Lead.")

The title of the project as carried now in our files is "The Metabolism of Lead in Man," B. "The Fate of Inhaled Particulate Lead Compounds." "A" as indicated above was "The Fate of Ingested Lead."

I trust this information will aid you in cataloging this project.

Sincerely yours,

Robert A. Kehoe, M.D.
