SOIL LEACHING

R. H. Munch - 1760

Al Posefsky is right about landfill. What information can we put together from the soil samples in Florida about leaching?

The point Paul makes about degradation products is also valid. We should see if product does go to CO_2. Purdue studies suggest radioactive carbon as possible analytical tool to prove disappearance path.

Some time ago I calculated the % PCB and distribution in one of the Fla "holes" after 30 yrs for Bill Papageorge, whom I believe passed this info on to Al. I can search for this memo if necessary
