DIRECTORY OF COMPANIES MAKING PRODUCTS FROM RECYCLED VINYL PLANNED

Listings Due September 15

WAYNE, New Jersey, June 8, 1992 — A directory of companies manufacturing products from recycled vinyl is being compiled by the Vinyl Institute, the national trade association representing the leading manufacturers of vinyl (polyvinyl chloride or PVC) vinyl feedstocks and additives, and film and sheet products. Companies must submit material for the directory by September 15. There will be no charge for directory listings.

"We are developing this directory to help purchasing agents and government procurement officers meet the ever-increasing demand to use products made of recycled materials," said Robert H. Burnett, executive director of the Vinyl Institute.

The directory will list companies manufacturing products containing some percentage of recycled vinyl — either post-consumer or post-industrial. Information listed will include the company's name, address, telephone and fax numbers, contact person and a brief description of available products, including the percentage of recycled vinyl content.

Companies interested in being listed in this directory at no charge should contact the Vinyl Institute's Vinyl Environmental Resource Center at 1-800-969-Vinyl (8469).
