

R/M packing distributor solves cost/quality problem

... recommends R/M gaskets that give 25% longer life at 1/5 the cost of former gaskets

Pantasote Company, Passaic, N.J., producer of polyvinyl chloride and polyvinyl chloride acetate copolymer resins, encountered trouble with the gaskets on the manholes of its chemical reactors. The company called on New Jersey Engineering & Supply Co., an authorized R/M distributor, for help. A check with R/M's engineering department confirmed its decision to recommend R/M Big 7, Type 6 folded asbestos gaskets. Results have been outstanding. These gaskets have given 25% longer life, require no marking for repositioning, provide better sealing characteristics, have excellent shelf life.

Depend on your R/M authorized packing distributor to help you solve your packing or gasket problem. You can be sure he stocks the right material to meet your requirements in the fastest, most economical way. And ask him for a copy of the R/M Big 7 Packing Selection Chart. Or write to Packing Division, Raybestos-Manhattan, Inc., Passaic, N.J.
