Dr. Robert A. Kehoe, Director
Kettering Laboratory of Applied Physiology
Cincinnati, Ohio

Dear Bob:

Will you please tell Miss Sheppard that I shall not attend any meetings of the Research Club for a number of months as I am in Alabama on leave of absence from the University of Cincinnati. It is an awful job getting things started and I am unusually irritable, so if this note seems cryptic, don't think it personal.

I do need one bit of confidential advice from you. The Council on Foods, of which I am a member, is meeting next month, and I wonder if you would drop me a few lines as to whether or not you think the lead situation, so far as food is concerned, is under control and if you feel there should be some experimental work done on that aspect.

Very sincerely yours,

Tom
