

Air Quality Sub-
committee - Minutes

- 3 -

February 16, 1977

8. J4M - Stack Sampling Ports and Associated Facilities
E. J. Stitzer has agreed to review this standard for the purpose of recommending any needed revisions. Recommendations have been scheduled for the May meeting.
9. J5M - Noncontinuous Stack Sampling for Nitrogen Oxides
Revision draft by T. A. Kittleman is being prepared in finished form for typing.
10. J7M - Noncontinuous Stack Sampling for Particulates
Revision draft by T. A. Kittleman had been distributed for subcommittee review with the agenda for this meeting. No further recommendations were received and standard will be prepared in finished form for final review.
11. S2T - Threshold Limit Values of Airborne Contaminants
Review of the new section proposed for nontraditional work schedules, previously distributed to the subcommittee, was deferred due to lack of time.
12. S3T - Detector Tubes
L. T. Freeland reported that draft preparation is continuing and that he expects to have his portion of the work completed for the March meeting.
13. S4T - Measurement and Control of Asbestos Dust Exposure
New section to cover EPA Asbestos Emission Regulations information, prepared by J. J. Franz and as revised by C. E. Marsh, was reviewed briefly. J. J. Franz will expand the information on prior notification of demolition and renovation operations. The new section will be checked with Legal as necessary.

ADJOURNMENT

The meeting adjourned at 3:30 p.m.

NEXT MEETING

The next meeting of the Air Quality Subcommittee will be held on Thursday, March 3, 1977 at 9:30 a.m. in Room 12W1, Louviers Building.
