Hi Tim, Lonny, Shelley,
Per Jamie's request below, please find attached a 1 pager on so3349 for your review. he is looking for this back by noon today.

Jamie - we've written based on today's current status, but be aware that by the time this is used, things may have changed. for example, as early as tomorrow (friday 4/28) we may get additional direction on how to proceed with mitigation & climate change (per the SO the Dep Sec will provide guidance 30-days out). 300 may also get additional direction on how to proceed on all other things that may be a burden on energy.

Hi Karen, Steve, Kit,

As you may know, every year the Department asks the bureaus to identify topics and prepare briefing papers for the Secretary's budget hearings. Attached below is a briefing paper on Implementation of S.O. 3349, *American Energy Independence*. WO Legislative Affairs has

prepared the initial draft using content from previous briefing papers provided to us on the subject.

Could you please have the appropriate WO-200 staff (and potentially other WO-300 staff, if needed) edit, update, and rearrange as you see fit, keeping the paper as succinct as possible. ***Note that the Department's guidance specifies that the papers must be one page or less, 12pt., Times New Roman, with 1" margins on all sides.

We have a quick turnaround from the Department so please send us your edits by **tomorrow (4/27) at noon**. We will then send the papers to the ADs and WO-100 for surname.

Thanks and please let us know if you have any questions.

U.S. Department of the Interior

Bureau of Land Management

Legislative Affairs Division (WO 620)

(202) 912-7138

jpool@blm.gov

BUREAU: Bureau of Land Management (BLM)
MEMBER: General Interest
ISSUE: Implementation of S.O. 3349, American Energy Independence

Key Points:

- Secretarial Order (S.O.) 3349, *American Energy Independence* implements the review directed by Executive Order (E.O.) 13783, *Promoting Energy Independence and Economic Growth*, focusing on decreasing the regulatory burden associated with energy production.
- In addition, S.O. 3349 revokes S.O. 3330, *Improving Mitigation Policies and Practices of the Department of the Interior*, and directs DOI bureaus to identify all actions taken related to S.O. 3330 and the 2015 Presidential Memorandum, *Mitigating Impacts on Natural Resources from Development and Encouraging Related Private Investment*.
- In addition, E.O. 13783 rescinded several climate change related directives and S.O. 3349 directs DOI bureaus to identify all action taken related to the rescinded climate change directives.
- Finally, S.O. 3349 specifically directs the BLM to review a number of other agency actions that may place an unnecessary burden on domestic energy development.

Background:

- S.O. 3330 established a DOI-wide mitigation strategy through a landscape-scale approach, early integration of mitigation considerations in project planning and design, and considering the durability, transparency and consistency of mitigation measures.
 - Consistent with S.O. 3330, the BLM finalized its interim (June 2013) mitigation policy, incorporating the S.O. 3330 strategy and issuing a Mitigation Manual (MS-1794) and Mitigation Handbook (H-1794-1) in December 2016.
- The Report of the Executive Office of the President of June 2013, *The President's Climate Action Plan* contained three broad goals related to climate change mitigation, adaptation, and international leadership.
 - As directed by the Council on Environmental Quality Guidance that derived from this report and other executive actions, the BLM integrated a more quantitative approach to the consideration of greenhouse gases and climate change into its decision-making and planning processes. The BLM also manages public land to address wildfire, drought and other issues that relate to adaptation.

Current Status:

- Provided a list of all actions to the Secretary adopted or in the process of being developed on mitigation and climate change since the policies specified in the SO 3349 were issued.
- Identified all existing agency actions that potentially affect the development or utilization of domestic oil, natural gas, coal, and nuclear energy resources.
- Preparing to propose that the BLM's March 26, 2015, final rule titled *Oil and Gas; Hydraulic Fracturing on Federal and Indian Lands* be rescinded;
- Reviewing, within 21 days, the BLM's January 17, 2017 final rule titled *Waste Prevention, Production Subject to Royalties, and Resource Conservation* to ensure consistency with E.O. 13783; and
