

**Ford High Temperature Nickel Anti-Seize Lubricant**

10. Apply Ford High Temperature Nickel Anti-Seize Lubricant to the inside of the rotor hat.
- Use only Ford Anti-Seize (F6AZ-9L494-AA) designed for high temperatures.
 - This prevents corrosion between rotor and hub which could cause rotor runout.
 - Apply a light coat only.
 - Do not get anti-seize on stud threads.
