

1 entrance to the tire shop was about 10 feet from the
2 garage area.

3 Q Now, in addition to doing brake work at the
4 Preston Street garage from the time that you got there
5 in 1945 up until 1962, did you ever do any clutch work
6 there?

7 A Yes.

8 Q And how did the work that you did with
9 clutches compare to the work that you did with respect
10 to brakes?

11 A Well, what you would have to do is jack the
12 vehicle up, secure the vehicle, remove the drive
13 shaft, remove the transmission back, and you remove
14 the crusher plate and maybe the release bearing.

15 Q And was there any dust that was generated in
16 removing any of these items?

17 A Yes.

18 Q Now, when you worked at this garage on
19 Preston Street from 1945 to 1962, how often would you
20 have to do a clutch job?

21 A Well, maybe occasionally. Not that often.
