Attached for your information is the Federal Register notice regarding the final rule on asbestos along with a cover letter from Gary Rowan. The significant change in this rule is the addition of an Excursion Limit (EL) which in turn triggers other requirements. Jim and I will review the regulation and attempt to identify any new requirements it imposes. Please do the same and funnel your observations and questions to Jim. We will make sure the questions and observations reach the appropriate parties. Please submit your input by November 15, 1988. The rule is already effective.
