RE: Time Magazine Article

As you will recall, in the April 25 issue of Time Magazine the cover story on cancer included a chart of types of cancer with causes noted -- including vinyl chloride under lymphoma. The source of the information was given as the American Cancer Society.

Enclosed is a copy of the ACS 1994 Facts and Figures report which ACS provided to Michelle McDonough of Edward Howard & Co. I have highlighted items on pages 14/15 and 20 where vinyl chloride is so noted.

Let me know what action, if any, you think we at the VI need to take and whether you are aware of any action being considered by the Vinyl Chloride Research Panel at CMA.
