

1 Q Okay. It lists procedures
2 recommended to minimize asbestos dust exposure
3 during brake and clutch servicing, and it lists
4 items 1 through 9; is that right?

5 A Yes.

6 Q All right. Down there on item 3, in
7 1983, that, at least that Ford industrial
8 relation bulletin says, that during brake
9 servicing an air purifying respirator shall be
10 worn during all procedures starting with the
11 removal of the wheel and including the
12 assembly.

13 Did I read that right?

14 A Yes.

15 Q All right. Then on No. 4 they say,
16 and it's underlined, that under no
17 circumstances shall compressed air or dry
18 brushing be used for cleaning.

19 Did I read that right?

20 A Yes.

21 Q All right. The question I wanted to
22 ask you again is, does it appear at least to
23 you that that's new information that Ford is
24 putting in industrial relations bulletin in
25 1983?
