Cincinnati, Ohio

Dear Dr. Kehoe:

I have read the article in the American Medical Association Journal entitled "The Lead Detectives are At Work In Cincinnati" and I am vitally interested in your findings and effects of paint solvents. What damage or toxic effects can result from the inhalation of paint solvents? If your laboratory has not worked with paint solvents can you direct me to other sources who have?

I shall appreciate any help you can give or direct me to that can answer my inquiries.

Thank you for an anticipated early reply.

M. D. Bennin
Yours very truly,
