by Dr. Herbert M. Evans, director of the institute and world-recognized biologist, "in presenting an imposing record of scientific accomplishment." The Foundation report received 150 articles published by the Berkeley staff between June 1940 and early 1941.

The Booksellers report sets forth that Vitamin E and its relation to fertility was discovered at the campus institute. Many studies were also made of the physiology of the same vitamin deficiency, requirements of pigs for this substance and effect of feeding humans for certain muscular diseases.

It was further stated that four of the six hormones secreted by the pituitary, so-called "master gland," have been isolated and purified by members of the staff and much learned about the chemical structure and biological effects of these hormones.

The report further enumerates researches of Dr. Evans and his staff on the physiology of the adrenal glands, possible interrelationships between vitamins and hormones, and action of the latter upon body processes.

El Cerrito Acts For Civic Center

EL CERRITO, Sept. 10—First steps toward the construction of an El Cerrito civic center were taken today by the unanimous action of the City Council. Mayor Louis F. Davis appointed City Clerk Miss Clyde Foley to enter into an agreement with an architect for the drawing of plans for a new city library.

Simultaneously, a referendum bonding which will be sponsored jointly by the State and El Cerrito, will be on San Pablo avenue near the City Hall annex.
