1982 SHAC ACTIVITIES
PMSB Report - May 19, 1982

STATUS

STOP Concerns

See SHAC minutes.

Review of 1981 Brainstorming Suggestions

See attached handout.

Armored For Safety Program

--Kickoff news article was planned for week of May 10 as Wise Owl Award (Blankenship)--canceled.

--Armored for safety article to issue Plant News next week (with STOP special edition) - Riddle.

--Cafeteria display of protective equipment and armadillo - June 1 - OSC.

--Unit/craft team memo request for "Burma Shave sign" caption, to issue by end of May.

--PMSB requested to initiate June safety meetings for "protective equipment used in unit or craft."

--Hourly check messages began 5/13.

Portable Buildings Action Request

Action request issued 5/3. PMSB members are requested to issue a memo to G. L. Tromblee (copy to D. D. Kos) summarizing action plan for each building by June 9. SHAC will pull together total plant summary for June PMSB report. Maintenance has agreed to identify Ed Crow's group as portable building co-ordinator, beginning third quarter. Recommend status be reported quarterly.

Hourly Safety Committee

Attendance was five of nine members (one - family illness, one - out of town, two - forgot). Dennis Kos will request unit-craft contact supervisor (through manufacturing superintendent) to counsel with members who miss two sessions (mild but frank one-on-one). George Danner reviewed the Investigation P-Bulletin and the pumper gauger injury resulting from a tank truck HCl release. C. M. Cruse reviewed the special tank entry and cleaning procedure to be used in the near future on a trial basis.

Quarterly S/H Inspections

Scheduled for June. To concentrate on completion status of previous comments.

S/H Competition Program

SHAC is developing and evaluating a modification of the quarterly inspections to incorporate a competition program. If ready for PMSB review by May 26, recommend special PMSB meeting for approval. This would allow June implementation.

5-18-82

1982 SHAC REVIEW OF
1981 FIRST QUARTER BRAINSTORMING-SAFETY SUGGESTIONS

	1982 Status
1. Communication	Improved incident communication.
--Safety Newsletter --Use Plant Safety Board (Plant Entrance) --Stress Accident/Incident Investigation Results --Stress Safety Projects	Improved HSC communication. Good safety program.
2. Management Visibility in Field (PM, PM Staff, Expanded Staff)	STOP will achieve the intent.
3. Plantwide Safety Program Should be:	
--Simple --Recognition/Awards/By Area --Visible --Individual Involvement --Motivative --Unique	Second quarter approved. Third quarter in development.
4. Training	
--1st, 2nd, Level (PM or SAC Chairman Kickoff)	Initial foremen and LP&S meeting May 6. Program now beginning.
5. Discipline for Safety Violations	Moving in this direction. Not visible enough.
6. Improved Safety Meetings --Cross Attendance	Action planned through 1st level supervisor and LP&S meetings.
7. Recognize Excellent Housekeeping and/or Safety by Areas	Under consideration by SHAC.
