Dear Doctor Kehoe:

Reply to your letter of February 22, 1945 was delayed until I had an opportunity to talk to Warren Cook on this subject.

My feelings in regard to the papers which had been proposed for the coming (and now canceled) meeting of the American Industrial Hygiene Association are the same as yours. It seems to me that the only ethical procedure is to write to each one who had apparently done any work on a paper and point out that even though the annual convention has been canceled, the publishers of Journals, such as Industrial Medicine and Industrial Hygiene and Toxicology, have signified their willingness to consider the completed papers for publication.

I shall be happy to contact all of the people to whom I had written earlier regarding papers in this connection if you decide this is the best method of handling the situation.

Sincerely yours,

Allen D. Brandt
