New York City.

Gentlemen:

As a member of the Skin Department of one of the larger New York City hospitals, as well as a stock holder in the General Motors Corporation, I wonder if you would kindly give me whatever information, pamphlets or literature that you may have on the possible effects of tetra-ethyl lead upon the skin.

If you have no such information available, could you inform me of any source from which I could obtain same.

Very truly yours,

Herman Cowan, M.D.
