OTHER CHEST HISTORIES.

The following men are known to have had chest complaints although no claim for compensation for these complaints were to our knowledge made on us.

GEORGE DUNBAR MCADIE

This man had a wide mining experience before joining us in 1945. From that date he was employed until 5th December, 1955. The greater part of his service was in the Mill but for a year or more he was employed as a Change Room attendant and Compound Cleaner - the latter in the Township.

He had received a warning after his X-Ray on 16.6.53 that he had silicosis in the early stages.

SCHEDULE NO. 5 (CONTD)

Some time in 1956 he was admitted to Hollywood Repatriation Hospital where he died - cause of death not known to us. War service - 1914 - 1918.

Then variously employed as Change Room attendant at the Mine and Compound Cleaner in the Town. Employment ceased 26.10.56.

On that date he was sent to Wooraloo and from there to Hollywood Repatriation Hospital. We believe his complaint to be tuberculosis. War service 1914 - 1918.
