

LOCKOUT/TAGOUT PROCEDURES AND PRACTICES

DATE:

9/23

INSTRUCTOR:

GP

I acknowledge I have received training on Lockout/Tagout Procedures and Practices. This training included the following topics:

- 1) Contents of Uniroyal Chemical Company, Inc., Painesville Plant Safety Standard 5.00, Electrical Tagout/Lockout Procedures.
- 2) Requirements of OSHA Standard 1910.147, The Control of Hazardous Energy (Lockout/Tagout).
- 3) How to effectively lockout and de-energize a piece of equipment prior to maintenance or servicing.
- 4) Recognition of applicable hazardous energy sources.
- 5) Prohibition to restarting or re-energizing equipment locked out or tagged out.
- 6) Discussion on the use of tags and their limitations.
