

## Interoffice Communication

To H. D. Riechers  
From K. G. McLeod  
Date April 11, 1977  
Subject Air Dispersion Study

As discussed previously by telephone, the VCM Plant requires an air dispersion study to complete an Emission Inventory Questionnaire for the Louisiana Air Control Commission. The Questionnaire is being submitted in conjunction with the vent incinerator permit request.

A complete air dispersion study is necessary, containing all atmospheric conditions (A through F) for all tabulated wind conditions. The wind direction will be out of the southeast.

The vents to be considered in this study are II-A, II-B, IV-a, IV-c, IV-j, IV-k and V-A.

As mentioned in our telephone conversation, this information is required as soon as possible. Any assistance you can render in expediting this study will be appreciated.

If there are any questions concerning this study, please direct them to J. O. Gibson or myself.

K. G. McLeod
