

September 5, 1975

TO: Dr. A. W. Mittlehner
Bethany

FROM: W. D. Harris, Ph.D.

The September 3, 1975 issue of the Federal Register contains a regulation on use of PVC articles in contact with food and beverages. I recommend that your people concerned with registration read this because I believe FDA is setting the stage for a somewhat more rational approach to handling the problem of carcinogens. It is certainly not a careless or easy approach for the manufacturer but does allow some scientific judgement.
