

ETHYL GASOLINE CORPORATION

CHRYSLER BUILDING
135 EAST 42ND STREET

NEW YORK

GRAHAM EDGAR
DIRECTOR OF RESEARCH

September 19, 1930.

P. O. Box 390,
Yonkers, N. Y.

Dr. R. A. Kehoe,
College of Medicine,
University of Cincinnati,
Cincinnati, Ohio.

Dear Kehoe:

Mr. Taylor has somewhat misinformed you on the subject of one of our employees having trouble with his teeth. The man was not Mr. Pope but Mr. Peters of our Tulsa Laboratory who was reported to us as having considerable trouble with his gums. Although we did not suspect that lead had anything to do with it, I thought it might be wise to have it looked into when one of your doctors was in the vicinity. I received this morning a letter from the Tulsa Laboratory saying that Dr. Schradin had examined Peters and found that lead had nothing to do with the condition of his teeth.

Our branch laboratories and the men in charge are as follows:

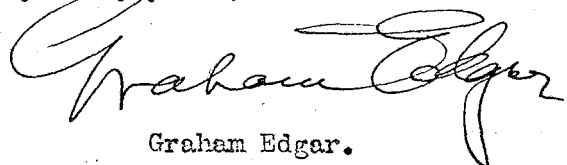

<u>Laboratory</u>	<u>Address</u>	<u>In Charge</u>
Detroit	723 East Milwaukee Ave.	Earl Bartholomew
North Kansas City	1917 Buchanan St.	M. E. Collins
New Orleans	1305 Burgundy St.	E. R. Anderson
Tulsa	305 South Kenosha Ave.	H. L. McIntire

Thanks for your reprint on "Diagnosis and Treatment of Lead Poisoning". I shall read this with interest.

I enjoyed seeing you last week and hope that the next time you come to New York you will be able to find time to come out and see us.

With kindest personal regards, believe me,

Very truly yours,

Graham Edgar.
