Prashant_Singh_Resume_2025.pdf 

Good evening Cole,

I'm Prashant Singh, newly appointed Branch Chief of the National Planning and Measures Branch. I wanted to briefly introduce myself and highlight some relevant experience that aligns with the administration's priorities.

My background includes:

- Direct experience implementing President Trump's Executive Order 13859 on American AI leadership
- Leadership in applying AI technologies in federal rulemaking, particularly in autonomous vessel regulation at the Coast Guard
- Contributing to major conservation initiatives, including analytical work supporting the Great American Outdoors Act
- Economic analysis and policy development across seven federal agencies

I'm committed to advancing the administration's goals and supporting Administrator Zeldin's vision for the EPA. As a demonstration of this commitment, I've been working from the office since day one following the inauguration, and my team will be transitioning to full time in-person work as well. We are focused on ensuring smooth operations and readiness for new initiatives.

I've attached my resume for additional background. I would welcome the opportunity to discuss how I can best support the administration's environmental and technological priorities, as well as identifying efficiencies and cost savings for the public.

Best regards,

Prashant
