Dear Sirs:

I am doing a one year science fair project for the Marquette Southeastern Science Fair and Junior Academy of Science. The purpose of my project is to show the relatively low toxicity of American made polychlorinated biphenyls to foreign made PCB's containing the impurity dibenzofurans. Please send me the price list on PCB's and a list of possible foreign sources. Also send me operational definitions on the detection of PCB's and dibenzofurans. I am enclosing a self addressed envelope with the proper postage assigned.

Sincerely yours,

Michael J. Keller
