

SPECIALIST

YOUR TAM FIELD ENGINEER is a ceramic specialist always at your service to help you achieve more efficient production of color-true, texture-perfect glazes.

Perhaps you are producing at peak efficiency. Perhaps not. Perhaps maybe.

But doesn't the "maybe" intrigue you?

Now, it's just possible your TAM Field Engineer may make a suggestion that will point the way to more uniform production of higher quality glazes. Perhaps a modification of glaze formula, or a new one. Perhaps the use of a TAM opacifier more exactly suited to your equipment and ware.

The point is...your TAM Field Engineer is a ceramic specialist who will work with you in your laboratory and plant to share his specialized knowledge every way he can...to help you reduce costs every way you can.

Another point to remember: Your TAM Field Engineer brings you the only complete line of opacifiers, plus exact lot to lot control of chemical and physical properties. TAM opacifiers are also color-range tested in a sensitive pigmented glaze.

Why not ask him to call?
