TRADEMARK FILE INFORMATION

Trademark:	Plaid Design
Trademark Owner:	Minnesota Mining and Manufacturing Co.
Last Assignee:	None
Date of First Use in Commerce:	December 31, 1963
Registration No.:	823,947
Date Trademark Registered:	February 14, 1967
Size of Label in Trademark File:	N/A

Receipt of Pictured Label by Patent Office: N/A

Irvington
BRAND

ARC PROOFING TAPES AND BLANKETS
NOS. 7000 and 7500

High voltage, underground cables are arc proofed faster and more effectively with "IRVINGTON" Nos. 7000 and 7500

"Irvington" Brand Arc Proofing Tape No. 7500 is a $\frac{1}{4}$ " thick, woven asbestos material. No. 7000 is also $\frac{1}{4}$ " thick, woven asbestos material, but is specially treated with a non-corrosive coating which adds moisture protection and increases arc and flame resistance. These materials are applied with No. 7500 as the first course and No. 7000 as the second course to prevent an arc caused by a defective high voltage underground cable from damaging adjacent cables before cut-off devices operate. No. 7000 may also be used as the sole protection. These tapes are applied either in 3" wide rolls or rectangular blankets. The application time is approximately 25% of other common methods and these materials are easily removed for inspection and re-applied.

USE "IRVINGTON" BRAND ARC PROOFING TAPES AND BLANKETS NOS. 7000 AND 7500

- For protecting high voltage underground cables from arc damage
- For protecting secondary cables from communicative damage

ORDERING INFORMATION
Nos. 7000 and 7500 are available in 2" and 3" x 10 ft. rolls and in 18" x 24", 24" x 27", 24" x 36" and 36" x 40" blankets
