G.K. Hammond - New York
W.R. Hibbard - Toledo/27
C.E. Peck - Toledo/25
L.W. Saxby - Toledo/25

PLAINTIFF'S EXHIBIT No. 31783

Attached are copies of interoffice memos by Stone & Webster Engineering Corporation showing that on all future projects asbestos bearing insulation is to be discontinued.

In view of this trend and pending litigation and workmen compensation cases, I suggest that all priority possible be placed on development of replacement product for kaylo in its present form. This to be done either by replacement of asbestos and/or development of high temperature glass product.

John Vyverberg (ljf)
